Sistemas Azteca has been an Authorized LINX System Solution Provider since 1999. We provide application and system integration services for the following applications:

- Data Acquisition
- Inventory Control
- Labor Scheduling
- Manufacturing Data Collection
- Personal Identification
- Time and Attendance
- Access Control

We are primarily specialized in the areas of Time and Attendance and Access Control, but we also develop customized applications according our customers needs in the other application areas noted above.

We specialize in serving the following industries:

- Automotive
- Beverage and Bottling
- Educational
- Manufacturing, Electronics and Electrical
- Retail and Grocery
- Textile

Sistemas Azteca sells directly to end users and other system integration firms. We will review and consider qualified sub-distributors anywhere in Latin America. Our system documentation is available in printed form, on CD-ROM (independently) and is included as part of the product deliverables on CD-ROM.
