HealthLine Solutions, which has been a wholly owned subsidiary of LINX Data Terminals since 1996, became an Authorized LINX System Solution Provider in 1989.

The firm specializes in providing turnkey application software, integration services and 24/7 system support for the following applications:

- Inventory Control
- Item Tracking
- Warehouse Pick/Put Lists

We exclusively serve the following industries in the USA:

- Hospital
- Health Care

Our proven systems include:

- VisCIMS™, turnkey, bar-code-based, hospital cart Inventory management and patient charge capturing systems and other products to the healthcare industry, principally hospitals (acute and extended care) and nursing homes, in both *Point-of-Use* and *Handheld Collection System* versions.
- CathLink™, a *Point-of-Use*, LINX terminal-based, Inventory Management system for Cath Labs

VisCIMS and CathLink can be linked to a wide variety of hospital systems such as:

- ADT systems including SUN System, HBOC, and others
- Materials Management Systems including Lawson, Peoplesoft, Infinium SSA Global Technologies, HBOC, GTE Inter-Mountain Health Care, SAP and others
- Patient Billing Systems including Phamous Last Word, HBOC and others

For additional information on these and other, soon-to-be-released, new products, please see our web site: www.HLSolutions.com
