Servicios Profesionales de Informacion (Professional Information Services) has been an Authorized LINX System solution Provider since 2002. We provide application/integration services for the following applications:

- Inventory Control
- Manufacturing Data Collection
- Personal Identification
- Quality Control
- Time and Attendance

We specialize in serving the following industries:

- Manufacturing, Electronics and Electrical
- Beverage and Bottling
- Hotels

The primary system services that we provide to these industries include Attendance Control, Control of Meals for Employees, and Quality Control data collection. Our proven products include the TRESS System, an Integrated Human Resources & Payroll Software for companies that work in Mexico and other custom plant applications for controlling employees and QC data. Our custom applications have been interfaced with TRESS and other software packages.
